

How did Scott & Team become part of the most effective anti-corruption task-force on Earth?

Scott accidentally got pulled into a federal investigation at the request of government agencies when they found out that the U.S. Department of Energy was being used as an insider slush-fund and stock market insider trading pump-and-dump valuation hype tool.

White House staff, now fired and under FBI investigation, hired Google and Nick Denton's sleaze-ball tabloid empire (Gawker, Gizmodo, Jalopnik, etc.) to flood the internet with their Fusion GPS-style character assassination articles and animated movies maliciously attacking and defaming, Scott. They spent over \$30M using the same tactics and services that Presidential candidates use attacking each other. They did this as political reprisal, because Scott and his Team helped federal investigators shut down the stock market embezzlement crimes that those White House staffers, and their Silicon Valley financiers, were engaged in. This, in fact, exposed the evidence that Google manually and maliciously rigs search results against competitors, ([*How Google Could Rig the Election - Robert Epstein ...*](#)) about which Scott has testified to the European Commission. Federal investigators have now discovered that the attacks were created and hosted on Denton's and Google's servers, and no-where else on Earth. They also uncovered the payola payments between the attackers.

Scott won a **Congressional Award from Congress in the Iraq War Bill**. This included a federal grant to help build America's next energy solution when anticipated current off-shore energy solutions failed. In the course of that effort, Scott's Team witnessed a federal crime and assisted federal investigators in the interdiction of it.

This is the case that exposed the dark heart of American political corruption. U.S. Senators, and other political figures, tag-team with their investment banker/stock market-playing spouses and friends, to harvest hundreds of millions of dollars per year, in personal profits from bribes, at the expense of taxpayers. How do politicians, that are

only supposed to be making \$150K per year, walk away with tens of millions of dollars per year? THEY GET THE EXTRA MONEY FROM DIRTY STOCK MARKET DEALS AND PAYOLA!

With an idea suggested by the members of Congress, Scott and his Team, essentially; helped the United States government sue itself! With help from Congress, they undertook a multi-million dollar, decade-long, epic series of anti-corruption lawsuits sponsored by the public.

First, with a unique new kind of pioneering federal lawsuit, they established — ***FOR THE FIRST TIME IN LEGAL HISTORY*** — that political cronyism is a valid basis for a claim of arbitrary-and-capricious agency action under the ***Administrative Procedure Act***. ***See: Federal Case One, (D.D.C. 2015)***. Scott and his Team created new federal laws around this.

Second, Scott prevailed in the ***United States Court of Appeals for the District of Columbia Circuit*** on the appeal of the district court's ruling that an agency may escape judicial review of its action by requesting a voluntary remand but refusing to reconsider its initial denial of an application. See: ***Case Federal Two, (D.C. Cir. 2017)***. The Washington DC Circuit agreed with Scott's Team that an agency may only seek a remand if it promises to reconsider its initial decision. It is because of that victory that the government, via GAO, FBI, IG's and Congressional oversight offices, are optimizing procedures to assure effective ethics and transparency. Scott's Team campaigned to make Congressional "insider-trading" illegal.

Congress of the United States
Washington, DC 20515

April 18, 2011

The Honorable Robert C. Fritchey
Chairman, Energy and Water Appropriations Subcommittee
U.S. House of Representatives
Washington, DC 20515

The Honorable Mary Kaye Kaptel
Ranking Member, Energy and Water Appropriations Subcommittee
U.S. House of Representatives
Washington, DC 20515

Dear Chairman Fritchey and Ranking Member Kaptel:

As Members of Congress with a strong interest in fuel cell and hydrogen technology, we thank you for consistently funding the FUEC Energy (EEO). We are writing to urge your continued support as appropriations of Fiscal Year 2014 Energy and Water appropriations create jobs, stimulate economic recovery, increase the efficient utilization of resources, reduce dependence on foreign oil and reduce energy pollution and greenhouse gas emissions.

As the Committee develops the FY 2014 Energy and Water bill, we to support \$140 million for the fuel cell and hydrogen energy program managed by the Office of Energy Efficiency and Renewable Energy (EERE) and \$50 million for the Solid State Energy Conversion Alliance (SECA) solid state fuel cell program in the Office of Energy Efficiency.

Sincerely,
 John B. Larson, Mike Doyle

Fuel cell and hydrogen technologies create jobs and are a crucial part of the portfolio of advanced energy technologies that will help achieve the nation's oil and greenhouse gas reduction goals. Fuel cells for stationary power and material handling equipment are becoming commercially available in niche markets and creating jobs today in domestic and export-oriented

Third, Scott's cases placed, on permanent public record around the globe, one of the most detailed documentation sets, ever assembled, about how modern political "Dark Money" conduits operate. The legal team hired ex-FBI, CIA and SEC experts to track down covert bank accounts, revolving door bribes, insider stock trades and other payola between Scott's competitors and public officials. This documentation now prevents the use of those kinds of criminal efforts against taxpayers, in the future, by exposing their tactics to the public.

Startup electric car company accuses Energy Department of corruption

By Day O'Neil | Published November 23, 2012 | [Full News Story](#)

The Department of Energy is coming under new scrutiny from a company that wants to build a partly autonomous car.

San Francisco-based startup IP Technology is building a lawsuit against the Department of Energy, charging it with "corruption and negligence" in the way it has handled the approval of applications for loans meant to support the production of fuel-efficient automobiles.

IP has designed a radical concept for a battery and hydrogen fuelled powered electric car reminiscent of a rigid train. It has

Fourth, Scott's team engaged in the interdiction and termination of corrupt agency executives, contractors and their financiers by filing FBI-quality complaints against them. This included some of the most recognized names in Washington, DC, at the time. Many of them were,

and are still being, investigated and surveilled by the FBI, GAO, SEC and Congress. In the course of this case, Scott's Task Force campaigned for the new law called **THE AMERICAN JOBS ACT** which created the first SEC approval of legal "Crowd-Funding", which allowed start-ups to get funding without going through the Palo Alto "Vulture Capitalists".

Fifth, and most important, the effort put every corrupt political scheme on notice that they WILL be found out and interdicted!

The bottom line?: Scott's Team WON on every single aspect of their public-interest litigation goals, **EXCEPT** they STILL have yet to be recompensed for their damages! New charges have now been filed, on their behalf, to seek that equity.

IMAGINE LIVING IN A WORLD WHERE ALMOST EVERY ONE OF THE PUBLIC OFFICIALS THAT WERE SUPPOSED TO HELP YOU TURNED OUT TO BE YOUR BUSINESS COMPETITORS. IMAGINE HAVING THEM USE GOVERNMENT RESOURCES TO PROFIT AT YOUR EXPENSE, BLOCKADE YOU AND TREAT DEMOCRACY LIKE A GARAGE SALE! THIS IS THAT STORY!

BRIBES than history has ever seen and then had giant tech-law firms bribe, hit-job and blockade any attempts to arrest them. Now, Special Grand Jury Hearings, FBI Investigations, FTC Task Force teams, EU hearings, public crowd-sourced forensics investigation social media users and other investigations, are ensuring that Gawker, Gizmodo, Google, and the rest are investigated, exposed, charged and terminated. Working with "Elliot Ness"-class federal cops, this team rained hell on the corrupt on behalf of the public and for the best interests of Democracy!

The issues are not about politics, the issues are about corruption and bribery crimes!

Lawsuit Alleges "Corruption and Negligence" at Department of Energy

Lachlan Markay | November 16, 2017 at 11:25 am | (22) | [Like](#) | [5.6k](#)

A lawsuit filed in federal court on Wednesday alleges mass favoritism in the Department of Energy's decisions to award federal grants to major car companies to develop electric vehicles, according to a legal complaint obtained by Scribd.

The plaintiff, San Francisco-based XP Technology, says in a complaint filed in the U.S. Court of Federal Claims that "corruption and negligence" pervaded DOE's decision to award loan guarantees to Ford, Nissan, Tesla Motors, and Fisker Automotive for the development of electric vehicle technology.

"Investigations have shown that DOE officials intentionally stalled numerous applicants' reviews in order to force them out of business and protect favored players," the complaint claims. It adds:

“XP has received information demonstrating that the unprecedented number of failures in the DOE program relative to what DOE officials have claimed to be the most
